IN THE CLAIMS

Please amend claim 10, as follows, and add new claims 11 and 12.

A1
10. (Currently Amended) A method for making the film according to claim 1, said method comprising the steps of:

- (i) coextruding layers having the composition of said layers (a) and (b);
- (ii) casting said coextruded layers of step (i) over a casting roll;
- (iii) stretching said cast film of step (ii) in the machine direction; and
- (iv) further stretching said stretched film of step (iii) in the transverse direction,

wherein at least one of said skin layers comprised of (i) a hydrocarbon resin and (ii) a copolymer of ethylene and at least one monomer having at least three carbon atoms said skin layer (b) is on the casting roll side of the film.

A2
11. (New) The method of claim 10 wherein a tie layer is interposed between and coextensive with layers (a) and (b).

12. (New) The method of claim 11 wherein said tie layer includes a cavitating agent.
